

ENZYMES IN BIOCHEMICAL RESEARCH

DR. MOHAMMAD YAQUB

M. SC. (PB)., M. S. (U. S. A).,

PH. D. (U. S. A)

DEPARTMENT OF CHEMISTRY.

DR. ALI A. HASHMI

M. SC. PH. D. (U. S. A)

DEPARTMENT OF ENTOMOLOGY.

DR. M. AKMAL KHAN

M. SC. (HONS) PH. D. (LONDON)

M. I. BIOL., F. R. S. A.

DEPARTMENT OF NUTRITION.

UNIVERSITY OF AGRICULTURE, LYALLPUR
(P A K I S T A N)

PRICE : Rs. 10.00

CONTENTS

S. No. Chapter Page

1. IMMOBILIZATION OF ENZYMES

1	General	1
2	Immobilization Techniques	2
3	Supports for Immobilization	5
4	Modes of Reactions	6
5	Literature Reviews	6
6	Practical Applications	7
7	Subunit Study of Enzymes	14

2. PHOTOCHEMICAL STUDY OF BIOLOGICAL SYSTEMS

1	General	22
2	Previous Reagents and Their Limitations	22
3	Photochemical Approach	23
4	Modes of Reaction of Carbenes and Nitrenes	23
5	Practical Applications	25
6	Preparation of 1-Fluoro-2-Nitro-Phenylazide	26
7	Characterisation	27
8	Importance in Biological Systems	28
9	Experimental Conditions for Immobilization	31
10	Affinity Labelling Technique	32

3. ENZYME ENGINEERING IN BIOLOGY

1	Enzymes in Molecular Genetics	37
2	Enzymes in Classification and Grouping of Organisms	39
3	Enzymes in Horticulture	43
