ALLAMA IQBAL OPEN UNIVERSITY

Allama Iqbal Open University, a mega university was established in 1974 under an Act of Parliament. The main campus of the university is situated in sector H-8, Islamabad. It was the second open university in the world and the first of its kind in Asia and Africa. The aim of establishing AIOU was to provide affordable and accessible education through distance learning at the doorsteps to those people who could not continue their educational journey through a formal system of education. The University (AIOU) operates on a semester-based system and admits students in Spring and Autumn semesters. Under-graduate admissions are offered in both semesters whereas postgraduates are offered once a year. The undergraduate students are given course books specially prepared by the university on self-instructional principles. However, at postgraduate level students are encouraged to self-study; therefore, no textbooks are provided.

At present, the AIOU is offering programs from Matric to PhD level in diverse disciplines from four faculties. The university has established study centers across the country, where distance education students are provided with necessary guidance by their respective tutors. Moreover, the university has established full-time study centers, wherein the students of M. Com, MBA (IT), MBA (Banking and Finance), BS (CS), etc. are being provided instructions, guidance and counseling through face-to-face mode of education. AIOU is also offering four years undergraduate degrees in various disciplines.

Apart from curricular and extra-curricular activities during the academic year, the AIOU and its regional centers actively participate in co-curricular activities by arranging educational and literary seminars, workshops and conferences, attended not only by the students and faculties of the university but also by the renowned dignitaries and scholars. For the science students and research scholars, a Science Complex has been built where they use the latest equipment of international standards for experiments and research. To meet the present-day challenges, an internet facility is also available in the student's hostel and the Central Library where computers have been provided to enable students to access the latest information available through open-source databases.

DEPARTMENT OF COMMERCE

The Department of Commerce stands as a pioneer in academic excellence of AIOU with significant contributions to the educational landscape since its establishment in 1978, initially named as Industrial Education Department. The Department commenced its journey by offering Industrial & Commercial Training Courses. In 1986, the Department experienced a rebranding, emerging as the Department of Business & Management. Subsequently, in 1987, it was divided into two distinct departments: the Department of Business Management and the Department of Commerce. In 1987, the Department of Commerce expanded its horizons, providing a comprehensive platform with the initiation of I. Com and B. Com programs. The team diligently worked to enhance the programs, setting the stage for the Department's future accomplishments. A significant turning point occurred in 2004 focusing on further elevating the quality of academic programs. The team dedicated themselves to the continuous improvement and up-gradation of the department's offerings. In 2011, the introduction of M. Com programs with a specialization in Accounting & Finance through approved study centers marked a notable achievement. In 2013, the Department obtained the NOC from the Higher Education Commission (HEC) to launch an Associate Degree in Commerce in a blended mode of learning, featuring eight specializations. In 2017, recognizing a gap in financial reporting skills among Commerce graduates, the Department introduced courses on financial reporting in the schemes of M. Com and BS Accounting & Finance. The commitment to academic

excellence led to the offering of BS Accounting & Finance in blended mode in the same year.

In 2021, the Department embarked on the development of MS Commerce postgraduate programs catering to the needs of ICMA, CA, and M. Com students keen on advancing their education and engaging in research work. The accomplishment of these efforts materialized in Spring 2023, with the successful launch of the MS Commerce program after obtaining the NOC from HEC.

In 2023, the Department achieved a major milestone with the accreditation of its BS Accounting & Finance program by ACCA—the Association of Chartered Certified Accountants—a world-renowned professional accountancy body recognized by the Higher Education Commission (HEC). This accomplishment reflects the Department's unwavering commitment to global academic and professional standards.

Building on this progress, in 2025 the Department identified the growing importance of e-commerce, data analytics, block chain technologies, and other IT-driven tools in the field of commerce. To meet these emerging needs and in line with the HEC Undergraduate Education Policy, the Department developed the BS E-Commerce and associate degree in E-Commerce programs. These programs have been duly approved by all statutory bodies and are scheduled to be offered from Spring 2026.

Since its inception, the Department of Commerce has played a pivotal role in producing thousands of business graduates, who, in various capacities, contribute to the nation's workforce. Upholding the vision of the University, the Department remains dedicated to developing skill oriented

and professional courses in consultation with accreditation bodies and stakeholders.

DEPARTMENT OF GENDER AND WOMAN STUDIES

Gender & Women Studies is the interdisciplinary programme which acts as a catalyst to highlight women's role in all aspects of life in the national development. The aim of the programme is to encourage women's role in the academic disciplines that have been historically male dominated. Gender and Women Studies expands definition and perception of gender, which is a social construction of male and female roles in the society. The discipline encourages critical analysis of the interplay of gender, class, and race in society. Furthermore, it offers the holistic approach to knowledge by infusing it with a new perspective to shape a better future for all the people. Thus the courses are designed to encourage further research and analysis on women's status in Pakistani society. The specialization in this subject is equally in demand, in public and private sector. It will prove beneficial in many careers, especially in service people such as, journalists, educationists, community workers, administrators and human resource managers etc.

DEPARTMENT OF LIBRARY AND INFORMATION SCIENCES

Introduction

Postgraduate library education in Pakistan started in 1956 by the University of Karachi. In the mid-eighties there were six library science departments all over the country. But they were not producing the required number of trained professional graduates as per demand. Moreover, the rate of technological change created by television, computer and other mass media was so stunning that many librarians had been unable to assess clearly its far-reaching effects on the sphere of their services and operation. Thus keeping in view the demand of professional staff and mission of AIOU, the Department of Library and Information Sciences was established in 1985 within the Faculty of Social Sciences and Humanities to cope with this shortage and change. It contributes to meeting the professional requirements of the existing libraries and training skilled manpower scattered all over the country in accordance with the emerging need and trend.

FACULTY OF SCIENCES

The Faculty of Sciences forms an integral part of the university. Since its establishment in 1982 with five teaching departments, it has undergone major development changes. It now comprises nine teaching and research departments which are offering courses at the undergraduate and postgraduate levels to more than ten thousand students. The faculty operates under the basic guidelines of the University Act and on an ‘Education for All as Convenient’ basis so that maximum students get benefit from its academic programs and educational facilities. This principle has necessitated some structural changes in the non-formal mode, particularly at the postgraduate level, in the offering of theory courses and practical lab work. This conceptual adjustment has been quite successful, and many in-service students are benefiting from postgraduate study programs. Improvement in qualifications for a better life is a right of everyone and the faculty’s programs meet this challenge by offering opportunities to all. A significant number of beneficiaries are those who cannot afford education in formal institutions due to a variety of reasons.

All the departments (Agricultural Sciences, Biology, Environmental Sciences, Chemistry, Nutritional Sciences and Environmental Design, Computer Science, Physics, Mathematics, Statistics & Engineering & Technology) of The Faculty of Sciences are running a variety of postgraduate technical, scientific, and professional programs successfully.

The departments are equipped with computer labs for practical work, teaching, research, and instrumentation labs for analysis. The University is developing these labs through its resources. The Faculty of Sciences is thankful to the Vice-Chancellor for giving personal attention to the development of the Faculty of Sciences by providing generous amounts of funds and valuable

guidance.

Around 80 highly qualified full-time faculty members are in the role of the Faculty of Sciences. Their role in the planning, designing and development of different courses, to meet students’ needs, is vital. Faculty members also engage in imparting and supervising instructions so that high standards are maintained. In addition, highly qualified and experienced Professors are also engaged on the contract or as part-time instructors, for postgraduate study programs. The University faculty is also offering academic positions under the tenure track system to attract the best minds in scientific and technological fields, as a full-time employee of the university.

Research is an integral part of postgraduate study programs MPhil and Ph.D. degrees in Agricultural Sciences, Chemistry, Computer Sciences, Biology (Microbiology and Molecular Genetics), Environmental Sciences, Nutritional Sciences and Environmental Design, Mathematics, Statistics and Physics. Rules and regulations for governing postgraduate study programs are those approved by the Higher Education Commission (HEC).

DEPARTMENT OF AGRICULTURAL SCIENCES

Department of Agricultural Sciences (DAS) is making earnest efforts aiming at supplementing, supporting and re-enforcing extension services and offering agriculture related programs at different levels. Agriculture progress in most developing countries has mainly involved an increase in the production of staple crops, the introduction of industrial crops and development of livestock production. One cannot deny the importance of livestock because it produces a huge quantity of food, such as beef, mutton,

poultry meat, milk, yogurt and lot of other milk, and animal byproducts. Millions of acres are still being cultivated with the help of farm animals in this mechanized era. At present, higher education in agriculture is imparted by four formal agricultural universities in Pakistan, which are not catering in-service personnel. The AIOU conducted a survey to get an idea about the higher education in Livestock Management Agricultural Extension, Forestry Extension and Rural Development and received a positive response from candidates who could not improve their qualification from formal Agricultural Universities for one or other reason and are now working in different governmental departments and NGOs. DAS has decided to offer MSc (Hons) Rural Development through distance teaching system, especially for those who could not enhance their qualification through formal system.

Objectives

To help literate farmers and rural communities generally to improve their everyday farming operations and basic skills; to improve the level of knowledge and skills of field extension staff by drawing on the latest research findings and expertise at the national and international levels; to help in adoption and diffusion of improved technology among the farming population. To promote human resource development in agriculture and its related fields. Supplementing, supporting and reinforcing extension services and offering agriculture related programs at different levels

BS Agricultural Extension (ODL)

(Programme Code 5080)

1. Introduction

Agriculture sector plays an important role in the economy of

Pakistan. It is the primary source of livelihood of the rural population of Pakistan as well as an important source of foreign exchange earnings.

For agricultural development in the country, strong linkages amongst institution building, human resource development, and technology transfer are very important. The technology transfer being a continuous process cannot possibly take place in a vacuum. It needs to be done in a well-organized system of agricultural extension where the role of the scientist, the extension agent, and the farmer are all too important. The scientist develops better yielding varieties and breeds of crops and animals, the extension agent on his part, equip himself with better and effective methods to convince the farmer of the product's utilitarian importance. Once motivated, the farmer will certainly adopt innovations for his own economic betterment.

The Allama Iqbal Open University (AIOU) therefore, being concerned with the education part of the agricultural extension system has therefore decided to initiate 4years BS Agricultural Extension to equip the students with skills and knowledge to be effective in building the capacity of the farmers to adopt new agricultural technologies and practices.

2. Objectives

- To improve the level of knowledge and skills of the enrolled students.
- To enhance the ability and self-confidence of students of agriculture to critically analyze the Agriculture Extension service and technology transfer system with a view to identify difficulties, problems, and issues in promoting applied research in farming systems research and extension.

- To promote human resource development in agricultural extension.

3. Admission Requirements

Candidates holding both pre-medical, pre-engineering or equivalent qualifications with a minimum of 33.0% marks from nationally and internationally recognized institutions will be eligible to apply. Foreign certificate/degree holders will need to provide an equivalence certificate from IBCC to seek admission in BS Agricultural Extension.

BS Rural Development (ODL)

Programme Code 5081

Introduction

Today's most severe problem is the gap between three pillars of sustainability; nature, society and the economy, are continuously widening, and the contradictions within these three sub-systems are also becoming more and more evident, thus none of these three pillars can be considered stable at its own. The intelligent response to this present situation would be the harmonization of nature, society and the economy. BS (Four Years) Rural Development is a multidisciplinary program that focuses on certain research problems and subjects require approaches, social and environmental dynamics affecting populations, activities and resources of rural areas. In this sense, BS Rural Development is conceived as a process resulting from joined-up actions which aim at producing socio-economic and environmental change within rural areas towards an improvement of the well-being of rural populations. Due to the complex and dynamic nature of rural areas, which is determined by social, economic, soil and climate, and technological factors, BS Rural Development conceives rural development as a process that is permanently evolving, interacting, and hierarchical regarding its results.

2. Objectives

BS Rural Development aims at training professionals at master level to be capable of performing their activities in the fields of teaching, academic research and actions of intervention through the acquisition of methods and concepts which allow them to

implement projects and carry out planning activities in favour of rural development. In this sense, the objectives of this program are:

(i) To analyze and evaluate the design, implementation and management of rural development projects and programs, as well as the consequences of these actions for society.

(ii) To investigate the implementation of public policies through the analysis and evaluation of rural development actions implemented at regional and local level.

(iii) To analyze the impacts and implications of contemporary public policies based on the participation and decentralization of rural populations.

(iv) To connect the insights on rural development with general socio-economic, political and cultural development. These objectives are intended to integrate rural development in a wider view on the concept of social development.

3. Admission Requirements

Candidates holding both pre-medical, pre-engineering or equivalent qualifications with a minimum of 33.0% marks from nationally and internationally recognized institutions will be eligible to apply. Department of Environmental Sciences

The approval for the establishment of the Department of Environmental Sciences was granted by the Executive Council in February 1998. The department was initiated with the aim of creating awareness and understanding of knowledge and skills required for sustainable environmental management.

Increasing environmental degradation due to urbanization has highlighted the need of Environmental Sciences as an integrated discipline designed to provide a comprehensive knowledge of the fundamentals of biological and natural sciences in solving environmental problems. The Environmental Sciences department is currently running BS and M.Sc. Environmental Sciences Program under the Faculty of Science at AIOU. The courses offered in the department are designed considering the multidisciplinary nature of the discipline and focus on understanding about fundamental processes that contribute to environmental pollution and natural resource degradation with the aim train students to combat pollution and ensure sustainable development in the country. The courses are reviewed from time to time through Committee of Courses to incorporate emerging modern trends in the subject.

Graduates from the Department of Environmental Science can find potential opportunities and career in national and international organizations working for sustainable development.

DEPARTMENT OF COMPUTER SCIENCE

The Department of Computer Science (DCS) was established in 2000 and has earned nationwide recognition for its commitment to quality education, research, and innovation. The department offers academic programs at various levels, including PhD in Computer Science, MS in Computer Science, BS in Computer Science, Postgraduate Diploma (PGD) in Computer Science, PGD in Cybersecurity, and PGD in Data Science. These programs are designed in accordance with national and international standards prescribed by the Higher Education Commission (HEC) and relevant accreditation bodies, while addressing emerging industry requirements.

The department is equipped with modern computing facilities, including digital classrooms, multimedia courseware development laboratories, and a dedicated departmental library in addition to the University's central library. It adopts a flexible and technology-enhanced teaching approach, offering face-to-face instruction for BS and MS programs, while utilizing online and blended learning methodologies for PGD programs and other specialized courses. Video conferencing and teleconferencing facilities are also used to support teaching, supervision, and consultation in research-oriented programs.

In addition to its academic programs, the department actively promotes research and development. To support these activities, the Multimedia Centre and the Open Learning Institute of Virtual Education (OLIVE) operate under the department's umbrella. The Multimedia Centre develops high-quality digital learning resources and multimedia courseware,

while OLIVE provides the technological framework for the online delivery of academic programs and courses.

The department's research interests span software engineering, computer networks, multimedia systems, e-learning technologies, instructional design, web-based education, mobile learning, course management systems, e-assessment, and technology-enhanced learning environments. Through these initiatives, the department contributes to the advancement of computing education and information technology in Pakistan.

The University has also established academic and research collaborations with international institutions, including San José State University (USA) and Kent State University (USA), facilitating knowledge exchange, research cooperation, and academic development.

Objectives of the Department

The principal aim of the Department of Computer Science is to produce competent graduates, advance quality research, and contribute to the development of computing and information technology. The department seeks to:

1. Maintain academic excellence and professional accreditation of its degree programs.
2. Promote awareness of current and emerging trends in Computer Science, Information Technology, and digital learning technologies.
3. Equip students with the knowledge, skills, and professional competencies required to address contemporary social, economic, scientific, and technological challenges.
4. Develop innovative platforms and systems for technology-enhanced and distance learning to expand

educational access, particularly in remote and underserved areas.

5. Conduct high-quality research in Computer Science, Information Technology, Software Engineering, e-learning, multimedia systems, and related disciplines.
6. Support other academic units in the effective adoption and integration of modern ICT technologies in teaching and learning.
7. Provide leadership and contribute to the advancement of ICT-enabled education and digital transformation initiatives in Pakistan.

تعارف:

علامہ اقبال اوپن یونیورسٹی کے قیام کے ساتھ ہی ادارہ عربی و علوم اسلامیہ قائم کیا گیا تھا۔ اس ادارے میں عربی زبان ادب اور علوم اسلامیہ کا شعبہ موجود تھا۔ ادارے کی طرف سے ابتدائی سطح پر السان العربی، تدریب المعلمین (اے ٹی ٹی سی)، میٹرک، ایف اے اور بی اے کی سطح پر اسلامیات، فقہ اور سیرت طیبہ ﷺ کے کورسز پیش کیے گئے۔
